To the Contractor—

OUR CUSTOMER

You will find in this our new "Contractors' Catalogue" that we have made the book helpful to you in suggestions to your customer the "Owner."

The great variety of up-to-date designs of "Built-in-Furniture" and "Interior Trim Units" as well as all items of Millwork are of more than ordinary interest as they are "Modern" designs up-to-date in every respect.

We ask that you give this Catalogue a place on your desk where it will be referred to often and hope it will impress you with the thought that "Riverdale" Millwork is the best and will satisfy your customer.

We Guarantee

THAT EACH AND EVERY ARTICLE IN THIS
CATALOGUE IS EXACTLY AS DESCRIBED

We Guarantee that any article purchased from us will satisfy you perfectly if ordered correctly.

If any article is not satisfactory in every way through our error, you can return it to us at our expense.

We will return your money including any transportation charges you have paid.

All prices shown are F. O. B. cars Chicago, Illinois
for "FACTS ABOUT FREIGHT CHARGES" see pages 158 and 159
SEND PLANS OR LISTS FOR DELIVERED PRICE ESTIMATES
How to Pay—See pages 2 and 3—How to Order—See page 156

Very Liberal Payment Terms

1. **PUBLIC BUILDINGS** where Bond protects materials. We ship to you and accept our payments monthly, enabling you to pay us as fast as you are entitled to money on your contract; final payments being made within thirty days after our final delivery.
2. **BANK GUARANTEE** sent to us with order. We ship to you and accept our payments within three days after each arrival for materials you found satisfactory, and allow you 1% cash discount on such payments. (Use our forms. Read full explanation on pages 2 and 3.)
3. **CASH WITH ORDER—2% Cash Discount.** Orders for less than \$5.00 materials are to be accompanied by CASH.
“ODD-WORK”—made special, not ordered under conditions of Terms 1, Public Buildings, or Terms 2, Bank Guarantee, is payable CASH WITH ORDER.
All quotations made are subject to 2% Cash Discount for full payment “CASH WITH ORDER” unless specifically quoted otherwise.
A Special 5% Cash Discount for cash with order is occasionally offered on Specific Quotations when conditions in the financial market warrant. Such discount can be applied only to those individual quotations.
4. **PARTIAL ADVANCE Payment with Order—1½% Cash Discount.** When Customers desire to make a payment in advance to cover part of order and send in BANK GUARANTEE for balance—or instruct shipment sent with BILL-LADING and invoice to Banker for payment at bank of balance on arrival—we then allow 1½% Cash Discount on Partial Payment and 1% Cash Discount on Final Payment.
5. **PAYMENTS AT BANK—C. O. D. When Materials Arrive—1% Cash Discount.** We ship stock materials without partial advance payments (except such as involve unusual freight expense) and send BILL-LADING with invoice to your bank for payment when each shipment arrives, allowing 1% Cash Discount.
6. **PAYMENTS AT BANK—C. O. D. EXAMINATION PRIVILEGE—1% Cash Discount.** We ship stock materials under this arrangement, also “ODD-WORK” if half value advance payment for special manufacture is made. BILL-LADING is sent to your bank with invoice for payment on each arrival. Your bank holds payment three days to allow unloading and inspection of materials. If any materials are not as sold to you, bank withholds value of those specific items until adjusted to the satisfaction of the buyer and seller.

WHOLESALEERS TO THE CONTRACTOR

Very Liberal Payment Terms

(Continued)

Many of our regular customers send us cash in advance with their order so they may take advantage of the cash discount we offer. We do not ask this, neither would we expect it where we have not sold previously and established confidence in our goods—our service—our honest dealing.

WE DO NOT EVEN ASK THAT YOU PAY FOR YOUR GOODS C. O. D.

OUR BEST GENERAL PROPOSITION is one which is based to your interest and at the same time is satisfactory assurance to us that if our goods are as represented the money will be forthcoming. This offer is that you have your Banker sign the GUARANTEE (our form), indicating that you have on deposit, or have by arrangement amount sufficient to pay for this order (you or the Banker can hold a copy), mailing this SIGNED GUARANTEE to us with your order—then goods are shipped to you—Bill Lading is sent to you—goods are unloaded by you—goods are inspected by you. After all this is done and within three days after each arrival, you call up your Banker and request that he send to us the payment for the shipment less 1% Cash Discount, provided you found everything satisfactory.

REMEMBER, if any items you find are not according to the order, you have only to tell your Banker the value of such items and instruct him to deduct this from our bill, he sending the amount deducted after mistake is adjusted. This GUARANTEE arrangement shows you that we have confidence in our goods and are willing to make this arrangement so that you are fully protected.

Odd-Work manufactured "Special" can be purchased without any advance payment where the Banker's Guarantee forms are used, which is also an advantage to you worth adopting in placing your orders.

When materials are sold freight paid by us to your station, you are authorized to send in to us or turn over to your Banker as the equivalent of cash such "original" freight receipts covering such shipments and these receipts will be accepted from your bank by us in part payment of your invoice.

PREPAY FREIGHT STATIONS—If there is no agent at railway station where goods are to be shipped Terms 2, BANK GUARANTEE, or Terms 3, CASH WITH ORDER, only will apply on such orders.

CAUTION—Always examine and count shipments before you take them from railway depot. See page 157.

SEND US YOUR PERSONAL CHECKS, if it is easier for you, which we will accept at full value, although we prefer that payments be made by Chicago Draft, New York Draft, Express Money Order, or Postal Money Order.

Mark your Order "Ship per Terms No. 2" if Bank Guarantee is sent.

Mark your Order "Ship per Terms No. 5" if Stock Goods are ordered C. O. D.

Chicago & Riverdale Lumber Co.

WHOLESALEERS TO THE CONTRACTOR

We Can Help You on Architect's Plans

Oftentimes it is inconvenient for you to make a complete list of millwork required for a building, on account of the intricate details and plans made by the architect. If you will send us plans, details and complete specifications, **OUR FORCE OF PLAN ESTIMATORS** will relieve you of all that trouble.

OUR ESTIMATE WILL SHOW YOU
A Delivered Price on the Entire List of Items.
Quantities Guaranteed.

Even if the plans are not large or difficult to figure, send them to us. We will gladly figure them for you and quote you a delivered price on the complete bill of Millwork required.

HOW TO SEND PLANS

Mail Plans first-class postage addressed to us at Riverdale Station, Chicago, Illinois, or ship them by Express to us at Dolton Station, Cook County, Illinois.

While we figure Millwork from Plans, we must ask our customers to furnish their own list of Lumber, Flooring, Shingles, etc., as we do not figure these items from plans under any circumstances.

Small orders placed with us have the same careful attention as though they were orders for carloads. It is a trial order we want.

OUR SAFE DELIVERY GUARANTEE

is printed on page 157. Read the entire page. It tells you what to do in case the railroad company delays or damages a shipment, or is short any bundles.

WHOLESALEERS TO THE CONTRACTOR

Your Design of Cabinets

We illustrate in the accompanying pages a number of selections of designs of

SIDEBOARDS, BUFFETS, COLONNADE OPENINGS, KITCHEN AND PANTRY CASES

which have proven very popular with our trade.

REMEMBER, we do not confine ourselves to these designs, but can manufacture CABINET WORK of any design from Architect's details or from your suggestions. If you have an idea you want worked out, send us a sketch showing measurements of space to be filled, also give us an idea of what is wanted and our draftsman will get out detailed drawings for you.

By a little personal care and pride your Built-in Furniture may be made to combine striking beauty and great utility without any extra cost.

Send us a picture of a sideboard which strikes your fancy, giving us width, length and depth to fit the opening you will place it in and we will make you a drawing to proper proportion showing you a picture of just what you will get. Or, we will make up a combination of a top of one of our cases and bottom of another—or if you would like a case with drawers where doors show in the cut—in fact, we'll make a drawing to suit your ideas if you will give us the idea.

We will be pleased to quote prices on application, or give any information you desire.

OUR CABINET WORK

is all made of thoroughly kiln dried lumber by skilled mechanics and is the same quality as any high grade BUILT-IN FURNITURE should be.

All prices shown are F. O. B. cars Chicago Illinois

WHOLESALE TO THE CONTRACTOR

Bookcase Colonnade

Chateau-Thierry

\$125.00

Suitable for openings about 12 ft. by 8 ft. 6 in.

Our very best effort in a Bookcase Colonnade. You will note that this Colonnade has, in addition to two Bookcase Pedestals, two very ornamental Brackets and overhead beams, the main beam on a radius which gives the opening a rich appearance. The Brackets are massive and, at the same time well proportioned, and we recommend this Bookcase Colonnade to anyone desiring the very best Colonnade to be had at anything like this price. The size of the Bookcase is 44 inches wide, 48 inches high, and has three shelves. The glass in door is 14x35 inches. Furnished in design shown. Bookcase is 10 inches deep. The Brackets are 4-inch face.

Glazed Art Glass, paneled back. Jambs, casing, and cap trim not included. When ordering, give width and height of opening, width of jambs, and kind of wood wanted. Electric fixtures not included.

PRICE: Clear Red Oak, Birch, Gum, Yellow Pine, or woods of equal value, glazed Art Clear Crystal Sheet and Bevel Plate Glass, \$125.00.

Glass designs are interchangeable. Select designs wanted. Unless otherwise specified, we will ship this design.

WHOLESALE TO THE CONTRACTOR

Kitchen Window Case

No. 1635

The Satisfaction derived from a beautiful and comfortable home outweighs all other considerations. No home is complete, no home has reached that degree of comfort necessary to the complete enjoyment of home life unless it is furnished with judgment and in good taste. Our High Grade Cabinet Work will do more to convert a house into a home than anything else of equal cost.

Our Kitchen Window Sink Case is a very popular design which is being installed in most of the better quality residences and bungalows. The two upper cases are usually made 3 ft. wide, 4 ft. high, with finished ends at sides of windows; these cases are glazed clear glass and can be used to store dishes. In the lower section are pot closets and drawers. If desired one of the lower sections can be made a tilting flour bin. Cases are furnished put up complete as shown, bottom section, 18 inches deep; top section, 12 inches deep.

Price, Yellow Pine or Gum, glazed D. S.\$75.00

For room not over 12 ft. wide. Send sketch with order showing measurements. State kind of wood wanted.

All prices shown are F. O. B. cars Chicago Illinois

Built-in Ironing Board

No. 1674 \$7.50

Furnished in same wood as other inside finish in house.

Always state kind of wood wanted. Unless otherwise specified we will furnish Yellow Pine and Back Band Trim.

A wonderfully convenient ready for instant use Ironing Board at a price within the reach of all.

This Ironing Board is made to set in a Wall Recess 14 inches wide—that is—to set between 2x4 studding spaced regular 16-inch center.

Rough Opening 1 foot 2 inches wide, 5 ft. 10 inches high, $4\frac{3}{8}$ inches deep.

The upper door is hinged at the side. The lower door is hinged at the bottom and catches in a cleat nailed on back of ironing board—thus lower door forms the brace that holds up ironing board when in use—to make ironing board 34-inch high frame in rough opening so bottom of rough opening is 22 inches above finished floor.

The lower door must be hung on spring hinges so it will close itself when ironing board is not in use.

Built-in Ironing Board No. 1674 consists of the following:

1 set jambs, 1 ft. $1\frac{1}{4}$ in. x 5 ft. 7 in.— $1\frac{1}{8}$ x $4\frac{3}{8}$ Rabb $\frac{3}{4}$ inch.

1 Cupboard Door, 1 ft. $1\frac{1}{4}$ in. x 3 ft. $9\frac{1}{4}$ in. $\frac{3}{4}$ —1 Panel.

1 Cupboard Door, 1 ft. $1\frac{1}{4}$ in. x 1 ft. $9\frac{3}{4}$ in. $\frac{3}{4}$ —1 Panel.

1 Ironing Board $1\frac{1}{8}$ x $11\frac{1}{4}$ —4 ft. 6 in. White Pine.

1 Side Trim for above to match other trim in house.

Bookcase and Desk Colonnade

Square Columns

Price \$60.00 Glazed

Bookcase and Desk Colonnade No. 1613

The latest and most up-to-date Bookcase and Desk Colonnade. In this illustration we show the most approved Colonnade in the market. You will note that this Colonnade has, in addition to bookcase, a desk and three pigeon-holes and two drawers. By using this Colonnade you will be able to save considerable space which otherwise would be wasted. When not in use the desk can be closed and is out of the way. The columns are massive and, at the same time, it is well proportioned, and we recommend this combination Bookcase and Desk Colonnade to anyone desiring something up-to-date. The size of the bookcase is 42 inches wide, 42 inches high, and has two shelves. The leaded art glass door is 10x30 inches. Bookcase is 12 inches deep. The columns are 10 inches square, tapering to 8 inches. The cap trim and casing are not included, but could furnish if you wish at extra price. Made for 5½-inch jambs.

PRICE, Yellow Pine or Plain Oak.....\$60.00

Glazed Art Glass as shown, panel back. Jambs, casing, and cap trim not included. When ordering give height of opening, width of jambs and kind of wood wanted. Hardware \$1.00 extra.

WHOLESALE TO THE CONTRACTOR

Doors Suitable for use with any Trim

The Best Door Made

"Riverdale Special" and "Riverdale Supreme"

The only Doors made entirely of "CABINET WOODS" that can be sold for as low a price as inferior woods.

Our "Riverdale Special" two panel or "Riverdale Supreme" one panel Door with White Pine Stiles and Rails, selected Birch Panels are an "All Purpose" Door which when brought under the same stain will match perfectly Yellow Pine or Gum Trim.

Birch Panels do not check as do other woods.

We have discontinued "Old Fashioned" such as four panels, five panels and five cross panel Doors. In case you absolutely must have these old patterns, we can furnish them but earnestly recommend the use of an "Up to Date" Door such as we have illustrated on opposite page.

Popular French Sash Doors

Carried in Stock for Quick Shipment

French Doors are becoming increasingly popular for Vestibule and Interior use. This design is modern and presents a richer appearance than can be obtained in any other arrangement of lights. We especially solicit your orders for odd sizes, which we can make and ship promptly in any kind of wood at very reasonable prices. Send sketch showing arrangement of lights and state size wanted, thickness, kind of wood, and how glazed. Stock Doors have 3½-inch stiles, requiring narrow basket locks, which we can furnish (see Hardware). Any width stiles can be furnished in special made-to-order doors.

Glass set with wood stops. Prices per pair, 2 doors.

Polished Plate Mirror Doors

Mirror Doors Are No Longer a Luxury—They Are a NECESSITY in Every Up-to-Date Residence and Apartment Building

Most homes now being built are fitted with one or more mirror doors. These doors are sometimes placed in the hall but more often in bedrooms or dressing rooms, and as a convenience their value cannot be overestimated. Any chamber door leading to hall or closet may be fitted with a full length mirror at so reasonable a price that all builders should insist on having at least one.

Old Homes Now Equipped with plain panel doors may be fitted with this convenience by replacing the old doors with our mirror doors. This may be easily and quickly done at slight expense. We carry in stock all the designs listed below and no matter what kind of doors you now have you will probably find one that will answer your purpose in our list.

DIRECTIONS FOR ORDERING

Give size, kind of wood and arrangement of panels of other doors in same room.

These doors should be used in bedrooms for closet doors. The best results are obtained if dresser can be placed directly opposite door, enabling party using mirror to have front and back view at same time.

NOTE.—Our competitors do not quote on beveled plate. Plain plate is worth \$2.50 per door less. We recommend the use of beveled plate.

1 3/4 in. thick, glazed 1 1/2 in. Bevel Plate Mirror one side—**sunk in door.**

WHOLESALE TO THE CONTRACTOR

Sanitary Flush Veneer Front Doors

Flush No. 1315

Any design of Divided Light Flush Door made up special from slabs we carry in stock. Almost any detail made at this price.

The value of a Flush Veneer Door depends very largely on the core or foundation on which it is built.

In our "Patent" construction we use White Pine core strips, matched and glued, forming Stiles and Rails with hardwood edge strips, and put together with hardwood dowel pins.

Flush No. 1316

2-10x7- 0 $1\frac{3}{4}$	20.00	32.50
3- 0x7- 0 $1\frac{3}{4}$	22.50	35.00

We use the same care in the manufacture of these doors that we do in the finest cabinet work, assuring our customers of excellency of material, design and durability that is in every way far superior to solid hardwood doors. They are light and strong and a positive economy to every builder.

All of our hardwood doors are built in pine cores, interlocked and glued, making a door foundation that is strictly warp proof. Over this core or foundation is applied $\frac{1}{4}$ -inch thick oak veneer, a product of oak logs of the very best quality.

The veneers are glued with the very best waterproof glue, making a door absolutely weather-proof.

The veneered door, properly made, is a great deal more durable than the solid door, as it will neither shrink, check nor warp.

CARE OF EXTERIOR DOORS

All outside doors should have at least **three coats** of good exterior varnish and the top and bottom edges thoroughly painted with lead and oil as soon as the door is fitted.

Our Hardwood Front Doors are made with extra heavy outside veneer to better withstand the weather.

Laminated Veneered Panels

ACTUAL PHOTOGRAPHS OF LAMINATED VENEERED PANELS

Figured Gum

Plain Red Oak

Quarter-Sawn
White Oak

Yellow Pine

See opposite page for complete list of Stock Sizes and Net Prices. We make to order panels any size up to 60x144 inches. If the size or combination you want is not listed, write or wire us and we will be glad to quote.

Most satisfactory results can be obtained by using our rotary cut, one-piece face, cross banded core Laminated Veneered Panels for making your own cabinet work or for paneling or wainscoting. Our veneered panels are sanded, ready for varnish finish. They will not check, warp or split. Rotary cut veneered panels show to the best advantage the natural beauty of the grain of the wood.

Door Trim No. 146

Order your trim as "sides of trim." Shipped in the knock-down. Well bundled. Quickly fitted. No waste. No damage in transit. We see that correct amounts are furnished, saving delays often caused by errors in billing.

In ordering, simply give the "side of trim" number, together with the casing number as appears and is described in detail page. For example

Five Sides of Trim No. 146 for Doors 2-8x6-8, Casing No. K8308.

Six Sides of Trim No. 147 for Windows 24x30—2 lt.

When ordering Sides of Trim give the sizes of Windows and Doors, also selection of Designs, kind of wood wanted, width of Mullion Casing, width of Window Stop. If for 13-in. wall, give width of jamb linings and stool. Unless otherwise specified we ship Stool 8267, Mullion Casing 5 $\frac{1}{2}$ in., Window Stop 8463. Door Stops not included with Door Trim.

Improved Beveled Inside Door Jambs

Made of Clear Stock in the following woods: Yellow Pine, Oak, Wisconsin Birch, and Gum. Carpenters and contractors cannot afford to make door jambs when high grade jambs such as we list on this page can be had at such reasonable prices. Every piece of lumber going into the manufacture of these jambs is first cut to $\frac{7}{8} \times 5\frac{1}{2}$ inches, then machined to $\frac{3}{4} \times 5\frac{3}{8}$ inch face, beveled back to $5\frac{1}{4}$ inches, thus allowing Casing to fit tight on face edge of jamb—a great improvement in manufacture, saving labor and assuring better results. The side jambs are dadoed with a machine made for this particular purpose. The head jamb fits into this dado perfectly. All jambs are surfaced and sanded with our heavy sanding machinery and are ready for finishing when received.

Made to order any size.

Note carefully, our Stock Jambs are $\frac{3}{4} \times 5\frac{3}{8}$, but we will make up special to your order any size, any wood, Transom Head or Sliding Door.

Price per Set, Dado

WHOLESALEERS TO THE CONTRACTOR

Something New in Window Glass

Sensational Improvement in Glass Manufacture

"A" Flat Crystal Sheet Glass

Ordinary Window Glass such as has been in general use for generations is now made practically obsolete by this wonderful new perfect glass.

Hereafter we will furnish all our Glazed Sash with only "A" Grade 18-oz. or 24-oz. Flat "like Plate Glass" Crystal Sheet—this is an exclusive feature with us—this quality Glass is not furnished by any other window dealer.

**This is the only Window Glass made insuring
a Clear Vision and Absence of Distortion.**

*What will you receive if your
Glazed Sash are furnished by
us?*

"A" FIRST QUALITY

Specifications

Selected Glass—made flat, even surface — devoid of noticeable scratches, cropper marks, burns or other prominent defects. Not a Cylinder made Glass—it is drawn out flat.

*What will you receive if your
Glazed Sash are furnished by
other dealers?*

"B" SECOND QUALITY

Specifications

Permits many defects in manufacture, such as waves, strings, lines, blisters, scratches, burns, and other defects. This quality embraces everything below "A" quality. Cylinder Glass—Not Flat.

Our 18-oz. Crystal Sheet averages 11 lights to one inch thick.
Our 24-oz. Crystal Sheet averages 8 lights to one inch thick.
Ordinary S. S. runs about 14 lights and ordinary D. S. about 9 lights.

All prices shown are F. O. B. cars Chicago, Illinois

Chicago & Riverdale Lumber Co.

WHOLESALE TO THE CONTRACTOR

Greatly Improved Window Glass

"A" Flat Crystal Sheet Glass

MADE By an entirely new process of manufacture—drawn out flat like a ribbon—entirely eliminating bubbles and other defects. Heavier and thicker than ordinary glass. Our 18-oz. Crystal Sheet averages 11 lbs. to the inch—ordinary S. S. 14 lbs. Our 24-oz.

Crystal Sheet averages 8 lbs. to the inch—ordinary D. S. 9 lbs. Boxes packed with a sheet of paper between each light of glass. Sold only in boxes. We will not accept orders for lights. If requested to do so we will furnish absolutely Free with each order for glass a very high class Glass Cutter.

We conservatively refer to 18-oz. and 24-oz. Actually it is thicker. Instead of 24-oz. the heavier glass runs about 26-oz.

See Next Page for Price per Box

We pack the glass very carefully in clean straw. No extra charge is made for packing. It is receipted, when sent, to be in good shipping condition. When you call for the glass at the freight office shake the box slightly. If there is a rattle you will know it has been broken. Open in presence of station agent and on the freight bill have him write number of lights broken. We will then refund money for breakage or replace it. Do not fail to mark breakage on freight bill or we cannot make an adjustment.

Combination Storm and Screen Door

(With Screen Panel Inserted)

DIMENSIONS

Door Size	Panel Opening	Glass Size	Price Each
2- 6x6- 7	23 1/2 x 55	20x24	\$9.50
2- 8x6- 9	25 1/2 x 57	22x26	9.80
2- 8x6-11	25 1/2 x 59	22x28	10.25
2- 8x7- 1	25 1/2 x 61	22x30	10.50
2-10x6-11	27 1/2 x 59	24x28	10.85
2-10x7- 1	27 1/2 x 61	24x30	11.20
3- 8x7- 1	29 1/2 x 61	26x30	11.50

The method of fastening the Screen and Storm panels in our Combination Storm and Screen Door is unique and we consider superior to any on the market, as it overcomes the serious objections to other Combination Doors. You will note from the illustration above that the metal lock is adjustable; each half turn of screw operating lock increases its pressure and holds panel firmly, thereby eliminating the rattling of the removable panels, a fault common to all other Combination Doors.

Observe that the metal lock is not visible and by its insertion into the center of the door stiles, adds to its strength and removes the possibility of its being tampered with. Most removable panels are held in place by catches fastened outside of door stiles and these become loose, caused by constant slamming of door, or are pushed from their fasteners by pressure from the outside. This is not possible with our Combination Storm and Screen Door.

STORM PANEL
Interchangeable with Screen Panel Shown in Door
Glazed Double Strength Glass

PANEL LOCK

PATENT APPLIED FOR

No. 59

Note that our Door is one in which the makeshift appearance by which other Combination Doors are recognized, is entirely missing. This is due to our design, in which the removable panel and door are flush, while in most so-called Combination Doors the removable panel sets out from the Door. 4-in. Stiles, 1 1/2 in. thick. Selected White Pine, sanded and smoothed after assembling. Ogee finish on inner edges. Furnished "In the White." Screen Panel wired with 14-mesh **Pearl Wire Cloth**—Storm Door Panel glazed D. S.

Ceramic Mosaic Floor Tile

FLOOR TILE EASILY LAID

Floor Tile is made up of $\frac{3}{4}$ -inch squares or 1-inch hexagons pasted on sheets of paper, about 2 feet long and 1 foot wide. The design is perfectly arranged on the sheets so the laying of the tile is a very simple matter. See full instructions, sheets 164 and 165.

FREE SKETCHES AND ESTIMATES

If Your Requirements make it difficult to order directly from these pages, send us a sketch of your room. Tell us the kind of tile desired and we shall gladly mail you a sketch and a free estimate, showing how your floor will appear when laid, and exactly what the tile will cost you. This service is free.

COLOR DESIGNS

It is Impossible to Show on these pages all the beautiful effects that may be produced with the use of Ceramic Mosaic Floor Tile.

Where Colors Are Shown for the borders or on field, we can supply red, chocolate, buff, salmon, light gray or dark gray, pearl, sage, green, pink, blue, black or almost any color desired.

TILE IN THE BATHROOM

The bathroom more than all other rooms must be kept clean and sanitary. The paramount virtue of tile in the bathroom is its imperviousness to moisture and dirt, the breeders of germs. Water splashed on a tile floor cannot soak in, and dirt on the floor or wall does not penetrate the tile but is easily wiped off with a damp cloth. Everyone is familiar with the superiority of white porcelain bathtubs and lavatories over the old painted tin tubs and marble wash bowls so common a generation ago. You are also familiar with the demand for open plumbing. The same conditions that required the abandonment of painted fixtures and boxed in pipes demand the use of tile floors and walls. The idea of having a white tiled bathroom is the same as having a white porcelain tub. When all dirt can be seen it is an easy matter to keep the room and fixtures clean.

SHIPPED FROM TILE FACTORY IN OHIO

Price shown for Tile is F. O. B. cars our Tile Factory in Ohio. Weight about 3 lbs. per square foot. Takes a very low rate of freight. For rate, see Freight Information, page 199.

Ceramic Mosaic Floor Tile

CERAMIC TILE FOR PORCHES

The use of Ceramic Roman Mosaic Tile for porch and veranda floors is becoming more and more popular. The tile meets every demand required of a good porch floor, and has many points in its favor not possessed by any other material. It is absolutely impervious to moisture and is superior to cement, for almost any design or color scheme required can be worked out with the many colored small tiles.

For design especially suitable for porch floors we invite your attention to No. 1023. When properly laid in good Portland cement it will withstand frost and all other actions of the weather. In large cities ceramic tile is largely used for sidewalks in front of stores, theaters and restaurants. Previous to the time we first offered ceramic tile in our catalogs a tile porch floor was a luxury enjoyed by only the most wealthy, but now by means of our wonderful methods of buying and selling we have placed this perfect material within the reach of all. One of the chief advantages of ceramic tile for porch and veranda floors is the ease with which it can be kept clean. An occasional mopping with soap and water is all that is required. The tile being fully vitreous is non-absorbent and for this reason the dirt needs only to be wiped off from the surface. Scrubbing is unnecessary.

Our No. 1023 when laid for Veranda Floor has the appearance of large tile 7 in. by 7 in. square, with mortar joint between.

Price, per square foot, No. 1023, $\frac{3}{4}$ -in. squares, Colored as shown, mounted on paper \$0.90

No. 1023 can be furnished in any size square desired—7x7 in., 6x6 in., 5x5 in., etc. State size wanted. Unless otherwise specified, we will ship size illustrated.

TILE FOR HOTEL LOBBIES OR STORE ENTRANCES

If you have a vestibule, a small room or a doorway entrance, whether it be at your residence, your store, or your office, or if it be a drug store, ice cream parlor or any place of business where pure, sweet, clean and sanitary floors are desired, send us your order and we will furnish you either of these handsome designs papered ready for laying. We guarantee it to be one of the best sanitary floorings you can buy.

Price, per square foot, No. 1022, $\frac{3}{4}$ -in. squares, Colored as shown, mounted on paper \$0.75

EASY TO CLEAN

Cleaning tile floors is a pleasure, not work. And they stay clean, too, so much longer than any other kind. Back-breaking scrubbing is forgotten when you have tile floors in your kitchen, bathroom, vestibule or place of business. The cost of this ideal floor has been greatly reduced by our system of selling, and we give you complete instructions so that an expensive expert tilewright is not required for the work of laying your tile floor.

The color scheme of the design you like can be changed to suit your ideas.

Nothing compares with white tile for bathroom floors, pantry floors, or creamery floors. Nothing is recognized as so suitable for hospital service rooms and operating rooms. Send us your order with a sketch and careful measurements for a bathroom or any other room where pure, clean, sanitary conditions must prevail.

PRICE OF PLAIN WHITE CERAMIC FLOOR TILE MOUNTED ON PAPER

Scheme for Laying Ceramic Tile Floor

In laying Ceramic Mosaic Tile Floors in concrete it is first necessary that enough space be allowed for concreting and the cement bed on which the tile is laid. This requires about $3\frac{1}{2}$ inches. In order to prepare for concrete the floors should be lowered between the joists as illustrated in the following plan:

The concrete to be filled in $2\frac{1}{2}$ inches of this space is made of a mixture consisting of the following material:

CRUSHED STONE CONCRETE

Five parts of crushed stone.
Two parts of sharp sand or creek sand.
One part of cement.

GRAVEL CONCRETE

Five parts of sand and gravel.
One part of cement.

After the concrete is filled in $2\frac{1}{2}$ inches thick, wood furring strips 1 inch thick by 2 inches wide should be laid on this concrete and leveled in the length and across the floor by the use of an ordinary level and leveling rod as illustrated above. After the concrete has set, a cement bed 1 inch in thickness mixed in proportion of two parts of sand, one part of cement and a very little slacked lime with it should be prepared. The lime is to keep the cement from setting too quickly, but if the job is small and the tile can be easily laid before the cement takes its initial set, no lime at all need be used. If a large floor is being laid, only about 50 square feet should be prepared at one time.

This is to be gauged off with a leveling rod the same as before, after which the strips are to be removed in this case and the space filled in with the same mixture of cement. (See next page.)

WHOLESALEERS TO THE CONTRACTOR

Scheme for Laying Tile Borders

You are now ready to lay the tile which should have been previously laid out on the floor, bottom side up, to facilitate the finding of the proper sheets. Start at one side of the room and lay the border first, paper side up. Lay the corner pieces and then work the border from the corners to the middle so that if the space will not permit the design to work out evenly, the break or mismatch in the border will come in the middle instead of near the corner, where it would be more noticeable. The body sheets are about 2 feet long by 1 foot wide and must be laid so as to bring the dots or figures in straight lines. It is necessary to tear the paper and use a half sheet in starting the body of some of the designs. When the sheets of tile are down, level them with a block and hammer. Then remove the paper by moistening it with a sponge or brush and pulling it off gently. When the paper is all off it is again necessary to go over the floor with the block, simply rubbing it to make sure none of the little tiles are tipped up or depressed. This part of the operation should be very carefully done, for when the cement once sets it is very difficult to make any corrections. While the cement is still fresh, remove enough along the line where the setter ends his work to leave a perfect edge so that when starting the next section it will be an easy matter to connect the two.

When the entire floor is laid it is necessary to fill the joints at the surface, as the under side of the tile has only been pressed into the cement below, which rose partially toward the surface of the tile. To accomplish this, Portland cement mixed with water to the consistency of thick cream is floated over the entire surface and rubbed into the joints with a flat trowel, allowing it to set from fifteen minutes to not over twenty minutes, when some sawdust should be thrown over the entire surface and the cement removed by rubbing well the sawdust on the surface of the tile. This will give you a finished Ceramic Mosaic Floor, perfect in every respect, clean, sanitary and pure.

Following these rules, instructions and diagrams, a perfect floor can be laid in the most approved manner without the use of an expensive tilewright from a distance, or, if located in a large community where tilewrights are found, you need not pay the high rate charged for this class of work, for you will have demonstrated to yourself that you can do it as well as anyone.

FREE SKETCHES AND ESTIMATES

If your requirements make it difficult to order directly from these pages, send us a sketch of your room. Tell us the kind of tile desired and we shall gladly mail you a sketch and a free estimate, showing how your floor will appear when laid, and exactly what the tile will cost delivered to your station. This service is free.

COLOR DESIGNS

It is impossible to show on these pages all the beautiful color effects that may be produced with the use of Ceramic Mosaic Floor Tile.

Where colors are shown for the borders or on field, we can supply red, chocolate, buff, salmon, light gray or dark gray, pearl, blue, sage, green, or pink—all interchangeable.

Per
Square

Everlastic Slate Surfaced Roofing is manufactured 36 inches wide in rolls containing enough roofing to cover 100 square feet of roof surface. Nails and cement are packed in the center of each roll and the ends of the rolls are protected by metal protectors to insure delivery of the roofing in perfect condition. Each roll of Everlastic Roofing weighs approximately 85 pounds. Everlastic Slate Surfaced Roofing is made of exactly the same material and surfaced with the same shades of crushed slate as the Everlastic Multi Shingles and the Everlastic Single Shingles.

Price per Roll, One Square.....\$2.50

Freight, 50c per Square to any point within 400 miles of Chicago—
less to all nearer points

Underwriter's Label on every package, which is for your protection as the Insurance Underwriters who are not interested in selling Roofing but are interested in Fire Protection, require Roofings bearing their Label to stand the following test:

50 Points or better Dry Felt Base.
32 to 35 Point Mullen Test for Strength.
250 Degrees Melting Point Saturation.
310 Degrees Melting Point Coating.

BUY ROOFING BY THE YEAR

Riverdale Everlastic Slate Surfaced Asphalt Shingles and Roll Roofings will prove to be the cheapest when cost is computed by actual years of wear.

MOST BEAUTIFUL ROOF

Riverdale Everlastic Slate Surfaced Asphalt Shingles and Roll Roofings are absolutely the best looking of any slate surfaced roofings on the market. Everybody who has used Riverdale Shingles refuse to accept any other brand.

WHOLESALE TO THE CONTRACTOR

Slate Surface Asphalt Shingles

RED AND GRAYISH GREEN

Nature's Own Colors—Will Never Fade

Slate Surfaced Shingles retain their rich color always. They are surfaced with real red or greenish gray crushed slate in natural colors. **GUARANTEED TO OUTWEAR WOOD SHINGLES.** Waterproof CLEAR THROUGH the roofing felt with asphalt saturation. The crushed slate embedded in extra asphalt coating furnishes a never fading color, and makes the roof practically fireproof.

**THE ONLY SLATE SURFACED SHINGLE ON THE MARKET THAT
WILL NOT CURL**

ALL SHINGLES ARE OF UNIFORM SIZE, 8x12¾ inches. Unlike wood shingles, there are no culls to be thrown away; there is no labor wasted in selecting the proper sized shingles for the proper place. Can be laid with less labor than wood shingles and look better than a slate roof.

Packed four boxes to the square, each box containing enough shingles to cover 25 square feet when laid 4 inches to the weather and ½ inch apart; 424 shingles will lay one square of 100 square feet; 424 shingles will cover as much surface as 900 wood shingles laid 4 inches to the weather. Can be laid on the same sheathing as wood shingles, even if roof boards are from 1 to 2 inches apart. This means quite a saving where old wood shingles have to be removed and shingles substituted.

RIVERDALE 4 in 1—32x10

RED AND GREEN SLAB SHINGLES "4 IN 1"

This Style of Shingle has been designed and made to meet the increasing demand for any easy-laying, decorative shingle. The exposed portion of the slab gives the appearance of the individual type shingle, and the top or covered part is a four-shingle self-locking slab.

Easy to Lay. The fact that each slab is equivalent to four shingles and that the ends form an interlocking joint, makes this style of roofing very easy to lay. The rapidity and ease with which the slabs may be placed in position will form a strong appeal where time is an element to be considered.

This "4 in 1" Slab Shingle is made exactly like our Red and Green Asphalt Shingles. **GUARANTEED BY UNDERWRITERS' LABEL.**

The Size of Each Slab is 32 inches wide and 10 inches high. It requires 112 slabs to cover 100 square feet laid 4 inches to the weather. Put up in packages of 56 slabs each; two packages for each square. Shipping weight, about 200 lbs. per square. To lay one square three pounds of nails are necessary. We can supply these nails at 9c per pound.

We Guarantee This "4 in 1" Slab Shingle to give satisfactory service for fifteen years, without painting or any attention whatever. **Will Not Curl.**

Soft Red and Green crushed slate is used to cover this shingle. These colors are permanent and will never fade. The shades are soft and rich and will blend with different color schemes of paint.

Price of sufficient Shingles to cover 100 square feet:

Doubletite Slab Shingles

The Latest Improvement in Slate-Surfaced Shingles

Here's the latest improvement in slate-surfaced shingles and it's genuine Quality roofing, too.

These Doubletite Slab Shingles are built up on a sturdy felt base that is thoroughly saturated and heavily coated with Specification Asphalt. The surface is coated with crushed natural slate in either a cool sage green or a deep Indian red.

The pattern of the Doubletite Slab Shingle is a pleasing variation from the common straight shingle effect. It gives the roof a distinctively individual appearance not unlike expensive tile.

But in addition to delivering a better looking roof this shingle has definite practical advantages that recommend its use in place of the ordinary slab shingle.

Four shingles are laid at a time. Five nails in the Doubletite Slab do the work of eight nails in individual shingles. That means economy of labor and materials.

There is no need for chalking off the roof since both the vertical and horizontal spacing are automatic. The lower edge of each slab lines up with the slots of the shingle below and the shoulder at the end provides for the proper spacing between slabs. These features mean more economy in application and an evenly laid roof.

But the biggest feature of the Doubletite Slab Shingle is that it builds a better roof. When applied according to instruction, the triangular projections at the top of the slab underlie the slots in the second course above, thus giving a double thickness at the slots where the ordinary slab has but a single thickness. It builds a roof that is double tight throughout.

Packed 2 bundles to the square—enough to cover 100 sq. ft. of roof.

A Distinctive Design

A Double Tight Roof. Double Thickness at the Slots

Lay Four at a Time

Automatic Spacing

Riverdale Shingle Roll Roofing

SPECIFICATIONS

Package: One square rolls—108 square feet of material; covering area, 100 square feet.

Average Weight: 90 pounds per square, including fixtures.

Fixtures: One pint lap cement; 14 ounces large head galvanized nails $\frac{7}{8}$ inch long. Directions for laying are inside each roll.

Colors: Natural unfading slate—Dark Red or Grayish Green.

APPROVED BY THE UNDERWRITERS

Riverdale Shingle Roll Roofing fills a long-felt need in the building industry—a roll roofing that looks like individual shingles, but costs only half as much. Home owners everywhere agree that Asphalt Slate Surfaced shingles make the most attractive and most serviceable roof covering on the market for the price you pay. Not everyone can afford them, however. Riverdale Shingle Roll Roofing has solved the problem—a fire-resisting roof that looks like Asphalt Shingles, at a price within the reach of everyone.

How It is Made

This roofing is made of high quality rag felt, thoroughly saturated with refined asphalt. A top coating of heavier asphalt compound is then applied, into which is rolled a heavy layer of crushed slate in natural colors of red or green. These colors are permanent and will not fade or discolor rain water.

While still hot, the sheet passes through rollers which mould it into a shingle pattern with 5-inch by 10-inch butts. The material is not weakened in any way by burning or scoring. Each shingle stands out as a separate unit. When it is on the roof you can hardly distinguish it from individual shingles. The heavy black vertical and horizontal lines produce the same shadow effect.

Two Styles

Riverdale Shingle Roll Roofing is made in two distinct styles—to lay up and down on the roof (see figure 1) and to lay horizontally (see figure 2). Both styles are packed in handy rolls 32 inches wide and $40\frac{1}{2}$ feet long, containing 108 square feet or enough to lay 100 square feet of finished roof, allowing for all lap and butt joints. Large head

WHOLESALE TO THE CONTRACTOR

Riverdale Shingle Roll Roofing

(Continued from opposite page)

galvanized nails, cement and complete directions for laying are packed inside of each roll. No special skill is required in laying it. The directions are definite and complete.

Durability

The material used in the manufacture of Riverdale Shingle Roll Roofing is the best we can obtain. The finished product is guaranteed ten years, but will easily last much longer. No paint is ever necessary. The rich colors of the slate are permanent and always attractive. Apply Riverdale Shingle Roll Roofing to your dwelling and your roof troubles are over for a long term of years. It is serviceable, economical and artistic. Its light weight (90 pounds per square) does not require heavy roof construction. This also saves on freight bills. It is in every way as good as more expensive roofings. Riverdale Shingle Roll Roofing is made from exactly the same materials as the famous Riverdale Strip Shingles, and by the same first class workmen. It is bound to give satisfaction. We guarantee that it will.

Figure 2

RIVERDALE SHINGLE ROLL ROOFING

Showing style to lay across roof parallel with eaves

Price per Roll One Square complete with nails and cement..... **\$3.75**

Be sure to specify if for over Old Shingles—unless otherwise specified we send Nails $\frac{7}{8}$ inch.

Use Over Old Wood Shingles

We particularly recommend its use over old wooden shingles. This saves time, money and labor in re-roofing. Nails $1\frac{1}{2}$ inches long should be used in this work. We will furnish this length nail when requested. On new work Riverdale Shingle Roll Roofing should be applied directly to roof boards.

Fire Resisting

Riverdale Shingle Roll Roofing is fire-resisting. Sparks alighting on the roof do not spread, for there is nothing to support combustion. It is inspected by the Underwriters' Laboratories and bears their label of approved roofings. The insurance rate is usually lower than on buildings covered with combustible shingles. It is an excellent roofing for structures located near railroad tracks or wherever there is a fire hazard.

A prepared roofing having a double surfacing—sanded on one side—"rubber" finish on the other; can be used either way—hence, an economical roofing. Put up in rolls 36 inches wide, containing sufficient roofing to cover 100 square feet of roof surface. Manufactured in three weights—Light, 35 lbs.; medium, 45 lbs.; heavy, 55 lbs. per roll complete. Nails and cement included. Metal roll protectors applied to rolls to insure safe delivery.

	Per Square of 108 ft.
Standard 36 inches wide.	
1-ply, complete, weight 35 lbs.....	\$1.25
2-ply, complete, weight 45 lbs.....	1.50
3-ply, complete, weight 55 lbs.....	2.00

A WORD ABOUT THE MAKER

To buyers all over the world the name "Riverdale" stands for DEPENDABILITY. It is a sure pledge of big value in ROOFING.

Economy—sure and satisfying—has gained for "ready" roofings a tremendous popularity throughout the country.

This popularity has naturally resulted in the appearance on the market of many different makes of roofing—some of them good, some of them not worth the expense of laying. **When they are new**, it is almost impossible even for an expert to tell the good from the bad. So the reputation of the manufacturer and his product is really the only safe guide in selecting roofing materials.

Improved Dome Damper

This is the most popular style Dome Damper made and is one we strongly recommend. The cover is pivoted in the center and is operated by a worm gear which holds the cover firmly in any position. The rod can be quickly adjusted to any length by loosening a set screw in the worm. No cutting or filing necessary.

The knob is solid brass, polished, and is marked to show which way to turn to open. The flange at the sides of the dome are extra wide, allowing great freedom in arranging the angle of the side walls.

This Damper may be used with or without a steel angle

Front and side sectional views of fireplace with the Improved Dome Damper properly installed. The best results will be obtained if the Damper is set on a 4x4-in. steel angle.

Best on Earth Window Screens

Our Window Screens are made from thoroughly dried Pine Lumber with mortised and tenoned joints, to prevent warping, sagging or opening. The edge of the wire cloth is covered with beaded moulding, mitered and carefully fitted into place, insuring a neat, workmanlike finish. We use the best black wire obtainable, but can also furnish rustless galvanized and Copper Bronze Wire when desired. Black wire will last indefinitely if painted every year.

Half Size Window Screens, 3/4 in. or 1 1/4 in. Thick

Made from Clear Pine Lumber dressed and sanded to proper thickness. Constructed exactly like full size screens and made full width of window to set in blind rabbet against outside of blind stop. When ordering give glass size and number of lights in your window.

Sliding Screen

We also make these half screens to slide up and down on a small moulding nailed to the blind stop. These screens are 1 in. (width of blind stop) narrower than window to set on blind stop.

Price—The price of half screens take one-half the price of a full-size screen with same size glass, and: If 3/4 in. thick add 15c net extra; if 1 1/4 in. thick add 20c net extra.

Cellar Screens

Strong, serviceable cellar screens with wood work painted black. Mortised and tenoned joints. Will not warp or sag.

All sizes up to and including 2 ft. 10 in. x 2 ft. Black wire.

Chicago & Riverdale Lumber Co.

WHOLESALESMEN TO THE CONTRACTOR

Best on Earth Window Screens

Riverdale Full-Size Window Screens

These Screens Cover the Entire Window on the Outside

No. 466

May Be Used as

Stationary Screen—Securely fastened.

Hanging Screen—Hinged to top of window.

Swinging Screen—Hinged to side of window.

Admits of free use of either upper or lower sash without admitting insects.

Construction

Pine Frames, 1½ in. thick; stiles or side pieces and top rail, 2 in. wide; lock (or center) rail, 1 in. wide; bottom rail, 3½ in. wide; **mortised and tenoned joints**. Edge of wire cloth is covered with beaded moulding, mitered joints.

Full-size screens are finished with one coat of black paint, 12-mesh black wire cloth.

We carry a large assortment of sizes in stock, painted black, with black wire cloth, and are in position to promptly fill orders for these screens to fit any regular two, four or eight-light windows.

NOTE: In ordering these screens, specify size of glass, number of lights and outside measurement of screen, thus: 24x30—2 light; opening 2 ft. 4¼ in. by 5 ft. 7 in.

Please send orders for screens to amount to not less than \$5.00. At these wholesale prices we cannot afford to crate and make shipment of a less amount.

The essential features of a Full Length Screen are:

Positive protection from insects of every description.

A screen that can easily and conveniently be operated in wet or dry weather, requires no sliding or shifting up or down, and insures perfect ventilation.

The illustration at left (No. 466) demonstrates all the above mentioned features and it will also be noticed that the windows can be washed without removing screen. This type of screen is made 1½ in. thick. Measure full size, same as you would for a storm sash.

Cupboard and Window Hardware

Steel Sash Pulley

These pulleys have open hearth steel axles $\frac{1}{4}$ -inch diameter and a wheel fitted with anti-friction bushing of the same material.

Face plates cannot break off when screwed in place. Steel pulleys are unbreakable.

Note how the back of the shell or housing completely envelops the wheel, making it impossible for the cord to get out of the wheel groove.

Boston Bronze Lacquer is a high grade finish which is baked on the steel in gas ovens under a high degree of heat. It is very durable and attractive.

No. C-700—Steel Sash Pulley, Boston Bronze 2-in. wheel, $4\frac{1}{2}$ x1 in. face. Per dozen75c

No. C-700

Plain-Sawed, Tongued and Grooved, End-Matched Oak Flooring

Hardwood Flooring is used in practically every house built. It will pay you to order of us, as no better quality of flooring than ours can possibly be obtained. Our flooring is the cheapest because it is the best, therefore costs less to lay. Send for samples.

SEND US YOUR ORDER. WE GUARANTEE TO PLEASE YOU

The Hardwood Flooring offered here is our highest quality in each grade. It is thoroughly kiln dried, carefully machined, with tongue and groove on ends and sides, and steel polished. It will take a beautiful hard oil finish and add greatly to the attractiveness of your home.

FACTS ABOUT FREIGHT CHARGES

The Freight on Flooring Is Nothing Compared to the Saving We Offer You

1000 ft. $\frac{3}{8}$ -in. Hardwood Flooring can be shipped 400 miles for.....\$3.50
1000 ft. $1\frac{3}{16}$ -in. Hardwood Flooring can be shipped 400 miles for..... 7.50
Weight $\frac{3}{8}$ in., 1000 lbs.; $1\frac{3}{16}$ -in., 2100 lbs., per 1000 ft. See "Freight Information."

How to Arrive at Amount of "RIVERDALE" Flooring Required

To cover a certain space, figure the number of square feet, which means the width multiplied by the length; for instance, a room 12 feet wide by 15 feet long would contain 12 times 15 or 180 square feet. Add to the square feet of surface to be covered the following percentages:

$33\frac{1}{3}$ per cent for.....	$1\frac{3}{16} \times 2\frac{1}{4}$ in.
$33\frac{1}{3}$ per cent for.....	$\frac{3}{8} \times 1\frac{1}{2}$ in.
.25 per cent for.....	$\frac{3}{8} \times 2$ in.

STEEL HOOKS FOR CONDUCTOR PIPE

These Conductor Hooks are made of all steel and galvanized, and are for wood.

No. 1666. All Steel Conductor Hooks.

Size	2 in.	3 in.	4 in.
Price, per doz.....	45c	60c	75c

HIP SHINGLES

Ornamental Galvanized Hip Shingles are designed for the covering of hips of roofs, either straight or curved. They can be adjusted to the different widths shown to the weather.

These shingles are intended to take the place of plain tin strips, wood or metal rolls.

There is no need to make close joints in the shingles at the hips, as the offset or border at the side forms a gauge or guide by which to keep them straight.

They may be used with shingles, slate, felt or any of the flat styles of metal roofings.

No. 6134. Ornamental Galvanized Hip Shingles, size 4x9. Price per crate of 250.....\$5.25

Galvanized Charcoal Iron Gutter

Standard Gauge (No Soldering Required)

SLIP JOINT EAVES TROUGH (No Soldering Required)

One end is fitted with a folded seam, into which the plain end of the other length can easily be slipped and it locks itself so securely as to make it water tight, thus doing away with the expense and inconvenience of soldering.

Slip Joint Eaves Troughs are made in 10 foot lengths without a seam. They come in either right or left hand. Right hand means the water is to be discharged at the right hand end of the trough and left hand, at the left hand end of the trough.

No. 6171R. Galvanized Slip Joint Eaves Trough, right hand.

Table for Estimating Nails

The following table will give the number of wire nails in pounds for the various kinds of lumber per thousand feet, board measure, or per thousand Shingles and Lath or per Square of Asphalt Slate Surfaced Shingles, with the number of nails added for loss of material on account of lap or matchings of shiplap, flooring, ceiling and siding of the various widths. The table will give the sizes generally used for certain purposes and the nailing space being 16 inches on centers, and 1 or 2 nails per board for each nailing space.

Always order a few extra 8d Common for Nailing Braces, etc.

Build - Your - Own Garages

Single Car Garage 10 ft. x 14 ft.

Price for Lumber, Millwork and Hardware, complete. No Floor..... \$127.50

Also furnished 10 feet by 18 feet for larger Cars for \$140.00

Less than One Year's Rent!

If you pay \$15.00 a month garage rent, you pay out \$180.00 a year. The only thing you have to show for your money is a handful of rent receipts.

We furnish lumber complete—2x4 studding—1x6 drop siding—Slate surfaced shingles. Clear Cornice lumber and outside finish. We furnish our celebrated set of three garage doors.

A WONDERFULLY SUCCESSFUL GARAGE DOOR AND HANGER

Low enough in Cost for the Cheapest Garage—High enough in Quality
for the Most Particular Buyer

Only its genuine superiority can explain the astonishing leap into public favor achieved by the Riverdale Garage Door Hanger and set of three Doors, which in two years has established itself, undisputedly, as the most successful sliding garage door and hanger made.

HOW IT OPERATES

The door is built in three parts, hinged together, so it can slide around a short curve. Hung on swiveled roller-bearing trolleys that operate on a continuous track.

The track extends across above the door opening, inside, and for the same distance along the adjoining wall, curved at the corner.

The door slides around the corner smoothly; doesn't cut off an inch of space.

It lies flat against the side wall when open, out of the way, and it "stays put." Track and hangers are inside, thoroughly protected from the weather.

One section swings like an ordinary hinged door. It isn't necessary to open the whole door for walking in and out, or to build a special small door for that purpose.

Directions for Ordering AND MAKING LISTS FOR ESTIMATES

Follow them, giving all particulars, and we can figure your lists and enter your orders immediately. Otherwise we are obliged to write for more information.

GIVE WIDTH FIRST—THEN HEIGHT

In all Millwork this is the universal rule:

2-5x1-4 always means 2-5 wide by 1-4 high.

1-4x2-5 always means 1-4 wide by 2-5 high.

WINDOWS AND SASH

TERMS USED AND WHAT THEY MEAN

Sash indicates a single piece.

Window means two pieces, an upper and a lower sash, made with either plain or check rail.

For regular sizes, give all the following information in the order named: 1st—Size of Glass. 2nd—Number of Lights. 3rd—Thickness of Wood. 4th—If Windows, whether Plain or Check Rail. 5th—State if Open or Glazed and describe kind of Glass required.

For Odd Sizes give size of opening to be filled, in addition to above description. Measurements in inches always mean glass size; in feet and inches they mean the outside measure or opening.

Illustration:

1 Sash 24x36—1 lt., means glass size.

1 Sash 2-4x3-5—1 $\frac{3}{8}$ —1 lt., means the opening size is 2 ft. 4 in. wide and 3 ft. 5 in. long.

DOORS

Always give all the following particulars in the order named:

1st—Width. 2nd—Height. 3rd—Thickness. 4th—Quality.

5th—Number and Arrangement of Panels. 6th—If Door has Name or Number, give that. 7th—If Door is Glazed, state Size of Glass and whether D. S., Plate or Figured.

MOULDING AND CABINET WORK

Be Sure to Specify Kind of Wood Wanted

If Cases set in Wall Recess, send sketch showing size of opening.

Important—If you give numbers from any other catalogue, state whose book and date of issue.

Splendid Quality has made our Millwork Popular.

Safe Delivery Guaranteed

PROVIDING YOU COMPLY WITH THE FOLLOWING INSTRUCTIONS

If goods do not arrive within a reasonable time, notify us, and our Traffic Department will promptly trace the shipment until it arrives at destination.

HAVE YOUR RAILROAD AGENT MARK EVERY SHORTAGE, BREAKAGE OR DAMAGE ON FREIGHT BILL

Do not sign receipt or pay freight or express charges until you have compared the NUMBER of bundles, pieces, etc., called for on our Bill of Lading, with that shown on the freight bill, and if there is any evidence of shortage, breakage, or damage of any kind, have railroad agent make notation to that effect on the freight bill, before you accept shipment. Then notify us at once and enclose the marked freight bill. If there is any shortage, we will trace missing material and in case it does not turn up in a few days, will duplicate it free of charge on condition that the missing items will be refused by you in case they arrive afterward. In case of breakage or damage if there is not time to return goods for repairs, have articles put in good condition locally, send us bill and we will send you our check for the amount.

These instructions apply on all shipments whether transportation charges are prepaid or collect.

Follow these instructions and we guarantee to stand between you and any possible loss or damage.

Facts About Freight Charges

THE FREIGHT ON MILLWORK IS NOTHING COMPARED TO THE SAVING IN PRICE WE OFFER YOU

On an average Local Freight Shipment of Millwork the freight is about 3 per cent of the total cost, and in Carload Lots it is about one-half as much.

HOW TO SAVE FREIGHT

All railroads have minimum charges, which vary in different parts of the country. As a matter of economy we suggest that our customers see that their orders include sufficient material to make shipment weigh 200 pounds or more.

Chicago, the greatest railroad center in the world, with 48 trunk lines, reaches every city in the United States, moving direct with quicker action than from any other shipping point.

When you place your order with us for both lumber and millwork, so that carload shipment can be made, you reduce the freight charge to the very lowest point. When millwork is ordered shipped by local freight, you can readily determine the approximate amount of freight you are going to pay by looking at the following tables. These weights are the shipping weight of a great many items that you will be needing, and other articles not shown in this list made of wood, like brackets, stair work, odd windows, doors, porch work, or any manufactured work in wood, it is safe to figure in a general way soft wood 2 lbs. to each foot of material in the work, and hardwood, or Yellow Pine, at 2½ lbs. per square foot of material.

Your shipping point is close enough to some station listed above to give you the approximate rate.

Carload lot rates are much lower. Send list for estimate.

HOW TO SAVE FREIGHT

All railroads have minimum charges, which vary in different parts of the country. As a matter of economy we suggest that our customers see that their orders include sufficient material to make shipment weigh 200 lbs. or more.

All prices shown are F. O. B. cars Chicago, Illinois
for "FACTS ABOUT FREIGHT CHARGES" see pages 158 and 159
